THE DAILY CASH CONSCIOUSNESS TRUTH

There is prosperity in the air – for me. I breathe this prosperity. And I attune myself to it in a relaxed way. It is just there. Existing. For me, now and forever! The first step I take is to definitely and deliberately breathe into it and assimilate it in my cells, organs and my body.

I am an irresistible form of human energy and through various laws governing the earth where I live and love, I develop the magnetic power to bring unto myself everything that I Divinely desire, according to the thoughts, feelings and mental pictures that I constantly entertain and radiate. I work on converting them into words and then take the required action steps to bring them to reality.

I am the centre of my universe. My universe begins with me and ends with me. And therefore, I understand the power and responsibility to cocreate whatever I wish and experience whatever I desire. I begin to mentally choose the cash consciousness that I desire to feel and experience by being very clear and precise about it.

My thought process and clarity bring forth wonderful opportunities from which I can choose the desired levels of health, harmony and happiness. My higher and deeper understanding of my cash consciousness leads to proper safety, correct security and a grounding stability for my best life to unfold for me step by step.

And then I choose for all of mankind what I have chosen for myself and I radiate it outwards from my being.

Through the workings of my cash consciousness, I live and breathe in the realization that this is a rich, bountiful, plentiful, friendly and infinite universe of continuous opportunities for growth and development and evolution and I am always willing and ever ready to accept its hospitality and enjoy its blessed offerings !
